ID Flow Release Notes

Release 6.3.25

Release Date: 4/2/2013

Note 1: Read 6.0 Release Notes if upgrading from version 5 or earlier for important information.

Features Added:
- Added support for UV printing with DataCard printers
- Added support for UHF encoding with MagiCard printers

Enhancements / Bug Fixes:
- Fixed an issue with PDF417 barcodes not encoding certain characters properly
- Fix Light Client bug where Workstation Options would be reset after connecting to Jolly Server

Release 6.3

Release Date: 10/11/2012

Note 1: Read 6.0 Release Notes if upgrading from version 5 or earlier for important information.

Enhancements / Bug Fixes:
- Database schema editor now supports MS SQL Server based databases
- Support for HID iClass Corp 1000 2k/2k smart cards
- Support for SHI C*Cure 800 access control system
- Support for smart card encoding and Zebra ZXP 8 printer
- Light Client now supports multiple Groups
- All desktop products including Jolly Server now support Windows 8 and Jolly Server 2012
- Easily convert from Jolly Internal Server to Jolly Server
- Fix for loading images from the web with special path characters

Release 6.2

Release Date: 06/26/2012

Note: Read 6.0 Release Notes if upgrading from version 5 or earlier for important information.

Features Added:
- Added new "Lite Edition" to all products that can only be used for a specific purpose; replaces Scan Station, Print Station, Report Station Editions
- Cardholder record data can be stored in the Jolly Server

Enhancements / Bug Fixes:
- Added support for the SnapShell Passport scanner
- Added the ability to parse the data returned by MIFARE, Prox and Smart Card commands
- Jolly Server installers now create a 2nd database containing the tables from the Sample Database
- The Sample Database data source option has been renamed to Internal Jolly Server and is no longer visible when connected to the Jolly Server; if the user still needs to connect to the Sample Database when using Jolly Server, they should use the MS Access data source option; this is automatically selected by the software if already configured to use the Sample Database while connected to Jolly Server
- Added "Auto-update record" and "Send e-mail" functionality to the registration process
- The Print button is now available in Designer > Database Setup UI
- Added support for building a record form drop down list containing all values present in the associated database column
- Fixed an error that occasionally occurred when printing to Zebra RFID printer
- Fixed a bug where Workstation Profiles were not saving properly
- Other minor bug fixes and feature enhancements

Release 6.1
Release Date: 02/17/2012

Note: Read 6.0 Release Notes if upgrading from version 5 or earlier for important information.

Features Added:
- Johnson Controls access control system integration
- SHI C-Cure 9000 access control system integration

Enhancements / Bug Fixes:
- Support for Topaz optical fingerprint pads on 64-bit systems
- Tool to migrate data from Jolly Internal Server (JLT file) to MS SQL Server-based Jolly Server

- Save advanced, driver-specific printer settings such as K-panel area
- Resize database images based on max pixel size
- Set database image JPEG compression level
- Set database image file type on per-database field basis
- Support for additional database image types
- Save record import settings
- Improved support for non-English characters
- Fix for workstation options reverting to defaults when the software is restarted immediately after being shut down or launched twice in quick succession
- Miscellaneous bug fixes

Support for Additional Canon Cameras
- EOS-1D Mark III
- EOS 40D
- EOS-1Ds Mark III
- EOS DIGITAL REBEL Xsi/450D/ Kiss X2
- EOS DIGITAL REBEL XS/ 1000D/ KISS F
- EOS 50D
- EOS 5D Mark II
- EOS Kiss X3/EOS REBEL T1i /EOS 500D
- EOS 7D
- EOS-1D Mark IV
- EOS Kiss X4/EOS REBEL T2i /EOS 550D
- EOS 60D
- EOS Kiss X5/EOS REBEL T3i /EOS 600D
- EOS Kiss X50/EOS REBEL T3 /EOS 1100D

Release 6.0
Release Date: 11/16/2011

Note 1: Microsoft .NET Framework 4.0 or newer is required

Note 2: Record filters have been enhanced; any stored filters you have created will need to be updated.

Note 3: Workstation Settings and Cardholder Group settings have changed; review your settings after upgrade.

Note 4: Shared Company Files (.jlt) are no longer supported; you must use Jolly Server when sharing cardholder data between multiple workstations

Features Added:
- RFID support

Enhancements / Bug Fixes:
- Replaced Company Server with Jolly Server, a more robust implementation
- Improved locking to protect shared resources
- Simplified Workstation and Cardholder Group Settings
- Multiple workstation printer support
- Added Task Configuration button to each task
- Auto-format ID card text
- Support for additional languages
- Minor bug fixes and enhancements

Release 5.2.0
Release Date: 06/20/2011
Note: Microsoft .NET Framework 3.5 SP1 or newer is required
Features Added:
- Add QR Code barcode support

Enhancements / Bug Fixes:
- Save Signature to a file
- Optionally save images to non-jpeg formats during enrollment
- Enhanced image importing
- Fix kiosk mode issue on some Windows 7 PCs
- Several minor bug fixes and enhancements

Release 5.1.0
Release Date: 03/16/2011
Features Added:
- Support for reading / writing MIFARE cards
- Support for reading Proximity cards
- Support for printing to Fargo UV / F-panel

Enhancements / Bug Fixes:
- Several minor bug fixes and enhancements

Release 5.0.3
    Release Date: 01/18/2011
    Features Added:
        - Support for S2 Access Control System
        - Support for DSX Access Control System
        - Support for Topaz optical fingerprint scanners
        - Link ID Flow user accounts to Active Directory user accounts
        - Improved Oracle support
        - Populate record forms by scanning the 2D barcode or magnetic stripe on a North American driver's license or ID card
    Enhancements / Bug Fixes:
        - Support for a 15 digit UID default value
        - Improved support for non-western languages and fonts including Arabic, Cyrillic, Greek, Hebrew and Turkish
        - Improved the automatic image reduction feature to support bitmap images
        - Fix for Topaz signature crop and edit issue
        - Improved image path support for certain TIF and JPEG images
        - Display a results summary after record import
        - Minor bug fixes and enhancements

Release 5.0.2
    Release Date: 10/06/2010
    Features Added:
        - None
    Enhancements / Bug Fixes:
        - Automatically downscale large images to max size threshold
        - Minor bug fixes and enhancements

Release 5.0.1
    Release Date: 07/20/2010
    Features Added:
        - Integrate with Access Control System (not available in all Editions)
        - Encode binary data in 2D barcode
    Enhancements / Bug Fixes:
        - Database performance improved when using field auto-updates
        - General UI enhancements and minor bug fixes

Release 5.0
    Release Date: 05/25/2010

The version 5.0 family of products offers new functionality that version 4.0 clients cannot utilize so if you have multiple installations that share data, you must upgrade each installation.

Also, you cannot run version 5.0 products on the same PC as version 4.0 products, for instance, you cannot install ID Flow 5.0 and Lobby Track 4.0 on the same PC. Both versions must be either 5.0 or 4.0.

Features Added:

- Significantly improved database performance when connecting to large and/or remote databases
- Configure separate printers for printing cards and reports
- New Record Center record filter option
- Company Database can be installed to user's existing MS SQL Server instance; user can then manage the database and access log data
- Canon flash camera support
- Photo face-detection and auto-crop
- Records with photos stored as files outside the database can be easily edited in ID Flow
- Export photos and auto-generate a data field photo path
- Support for Microsoft Access 2007
- On screen keyboard and other kiosk improvements
- Tutorial demo links added to Help menu

Features Enhanced / Modified / Bug Fixes:

- The design preview shown in the Main Menu is now a static image that can be set by the user
- Fixed problem where the software would not always completely terminate when closed
- Removed outdated Interlink fingerprint pad SDK integration as the devices are no longer manufactured and SDK is outdated
- 100+ general UI and feature enhancements
- Several minor bug fixes

Release 4.3

Release Date: 07/23/2009

Important Note: Due to enhancements to date / time and database field comparison, existing print conditions, record filters and auto record updates should be reviewed after upgrading from previous versions.

Features Added:

- Scan and process business cards during registration
- Check for duplicate records

Enhancements / Bug Fixes:

- Significant performance improvements when working with large, networked databases
- Immediate discovery of records added via other workstations
- Allow workstation profiles and groups to be shared between Jolly products
- Added authentication to e-mail server settings
- Additional auto-update record field options and data
- Minor bug fixes and UI enhancements

Release 4.2

Release Date: 03/02/2009

Features Added:

- Added Setup Wizard for cardholder group and workstation configuration
- Global Settings synchronization

Enhancements / Bug Fixes:

- Redesign of record layout and data formatting UI's
- Addition of 4 new log report fields
- Added option to only show background image on default screen
- Improved support for date / time related conditions
- Minor bug fixes and UI enhancements

Features Removed:

- Numeric data formatting has been removed with the exception of decimal places
- Image auto-edit feature

Release 4.1

Release Date: 12/18/2008

Features Added:

- Added Record Queries to Report Center
- Set workstation background color and image

Enhancements / Bug Fixes:

- Redesign of cardholder group setup
- Simplified auto-update database fields configuration
- Improved auto-resize font performance
- Added new profiles, cardholder groups and samples
- Updated language database
- Improved record layout functionality
- Improved startup times and overall performance
- Improved database connectivity times when connecting to large database with many tables

- Minor bug fixes and UI enhancements

Release 4.0.3
    Release Date: 10/14/2008
    Features Added:
        None
    Enhancements / Bug Fixes:
        - Fixed issue where card scanner settings were not always saved
        - Fixed card scanner photo acquisition issue

Release 4.0.2
    Release Date: 9/25/2008
    Features Added:
        - Workstation Profiles
    Enhancements / Bug Fixes:
        - Add automap functionality to card scanner and record import
        - Add card scanner functionality to Record Center interface
        - Add card scanner auto-feed support
        - Improved language translations
        - Minor bug fixes

Release 4.0.1
    Release Date: 8/12/2008
    Features Added:
        None
    Enhancements / Bug Fixes:
        - Improved fingerprint and signature pad support
        - Improved language translations
        - Minor bug fixes

Release 4.0.0 – Initial Release
    Release Date: 7/1/2008
